

TrueSolum™

PRODUCT DESCRIPTION

TrueSolum is a liquid soil amendment produced from the culturing of microalgae that increases crop yields through improved soil quality.

PURPOSE STATEMENT

When applied through drip irrigation or foliar spray, the metabolites present in TrueSolum interact with the soil and stimulate the natural microbial activity in it, causing positive changes in both the fungal and bacterial components in this microbiome.

Florida license F002635

Guaranteed by GreenTech Ventures, Inc. 10302 McIntosh Rd. Dover, FL 33527

DERIVED FROM: CHLORELLA MICROALGAE

EXPIRATION DATE:

SOIL AMENDING INGREDIENTS
100% MICROALGAE CULTIVATION SOLUTION

DIRECTIONS

Dilute in irrigation water 1:250 (15ml per gallon). This liquid soil amendment should be applied every week by adding to the regular irrigation water. For best results, apply from the initial planting process throughout the harvest cycle. Store in a dry, cool place. **Avoid direct sunlight.**
